

VidyaSetu — Cloud-hosted eLearning Platform Sanskrit College
Proposed Solution
20 Teachers • 100 Students • 100 Subjects • 7 Simultaneous Batches

Introduction

VidyaSetu is a **cloud-hosted eLearning platform** built exclusively for Sanskrit College, bringing together pre-recorded lessons, live classes, and online exams in one secure portal. Teachers upload and schedule content, students log in to attend classes at the right time, and the system handles attendance, recordings and exam scoring — all without any third-party app or platform dependency.

Phase 1 & 2 Overview

Phase 1 — Pre-Recorded Platform	Phase 2 — Live + Exam Platform
Teachers upload pre-recorded lessons. Students log in, see timetable and click JOIN at scheduled time. Video activates only at class time and expires automatically.	Everything in Phase 1 PLUS live interactive classes. Includes exam module — teacher sets question paper, students answer online, system auto-calculates scores once answer key is entered.

Features

Phase 1 Features	Phase 2 Features
Student & Teacher Login Portal - Pre-recorded video upload by teacher - Timetable — schedule by batch, subject and day - Video unlocks only at scheduled class time, expires after - Attendance — auto-marked when student joins - Watch Recording — past class videos anytime - Attendance & timetable reports — per student, per subject - Admin dashboard — manage teachers and students College branded domain with full SSL security	Everything in Phase 1, plus: - Live interactive classes inside the portal - Live sessions auto-recorded, available after class - Exam module — MCQ and descriptive question papers - Timed online exam with auto-submit - Answer key entry — system auto-scores all students instantly - Exam results — score and answer sheet visible to student - Exam reports — batch-wise and subject-wise - Timetable enhanced — classes and exams in one view - Attendance reports enhanced — covers live and recorded sessions

Technology Overview

The platform is secure and cloud-hosted, accessible from any browser on phone or laptop — no app installation required. Teachers and students log in through a single screen where the timetable, class join, recordings and exams are all available in one place. Pre-recorded lessons unlock automatically at the scheduled class time and expire once the session window closes. In Phase 2, live classes run directly inside the portal and are auto-recorded for later viewing. The exam engine allows teachers to set online question papers, conduct timed exams, enter answer keys for auto-scoring, and publish downloadable results. All data is stored on the college's own dedicated server with full SSL security — no dependency on any third-party platform or brand.

Monthly Infrastructure Cost

Component	Est. Cost/Month	Notes
Application Server (scheduled class hours only), Video Storage and Delivery	₹6,000–8,500	Portal + live stream + exam engine
Approximate Total / Month	~₹6,000 to 8,500	Conservative — actual likely lower initially

Notes

- Infrastructure costs are to be paid directly by the college trust — invoices will be raised in the trust's name and payments made by them directly to the service provider.
- The infrastructure estimates provided are based on maximum expected usage — actual monthly costs may be lower depending on real usage and number of active users.
- Domain and Security Certificate will be procured on the trust's name if not already available — charges at actuals, invoice raised directly on the trust.
- Development cost is fixed as quoted and is not subject to infrastructure fluctuations.

Connection Limits

Limit	Capacity	When to Scale Up
Simultaneous live classes	Maximum 8 classes at a time	Add a second video server beyond 10 classes
Students per live class	15 comfortable	Upgrade server size beyond 25 per room
Total concurrent users	100 safe	Scale server beyond 150 concurrent users

Investment Summary (Excl. GST)

	Phase 1	Phase 2
Development	₹2,85,000	₹3,15,000
Infra / Month	~₹10,000	~₹10,000
Delivery	20–25 days	40–45 days
Combined (Phase 1 + 2)	₹6,00,000 total development · All prices exclusive of GST	

Do's & Don'ts

Do's	Don'ts
• Run server only during class hours — saves up to 58%	• Don't share video links directly — always portal-controlled
• Timetable controls all access — no manual link sharing	• Don't run all 7 batches on Day 1 — pilot 2–3 first
• Publish answer key promptly — students await results	• Don't exceed 8 simultaneous live classes on base server
• Archive old recordings at end of each semester	• Don't bypass the portal for any file sharing
